

# JIFFY LUBE'S AIR CONDITIONING SERVICE R1234yf

Revised 05/17/2022

Jiffy Lube's air conditioning service is \$199.99 and includes a visual inspection of the system, analysis, filtering and capture of the R1234yf refrigerant, and a vacuum / pressure leak check of the system.

Prior to starting service, the R1234yf refrigerant in the system will be analyzed for purity. If the presence of Stop Leak Additive is found to be in the system, additional service will need to be performed including; removal and capture of the R1234yf refrigerant for proper disposal. Replacing the Receiver Dryer / Accumulator, the Orifice Tube and flushing the entire system. This service is an additional \$200.00 for most vehicles. If you decide not to perform this additional service, the process can be stopped at this point and you will be charged \$20.00 for the inspection and R1234yf refrigerant analysis.

If the purity of the R1234yf refrigerant in the system is found to be below 95% or the presence of Stop Leak Additive is found, the contents of the system must be removed and captured for proper disposal and cannot be reused. In order to recharge the system, all new R1234yf refrigerant will be used. The system on your vehicle holds \_\_\_\_\_ ounces of R1234yf refrigerant to recharge at an additional cost of \$\_\_\_\_\_. If you decide not to complete the service at this point in the service, you will be charged \$20.00 for the inspection and R1234yf refrigerant analysis

If a leak is found, we will provide you with an estimate to repair the leak. If you decide not to repair the leak, we will not recharge the system and you will be charged \$40.00 for the inspection, R1234yf refrigerant analysis and leak check.

If no leaks are found, the system will be recharged with the original amount of R1234yf refrigerant removed from the system plus any additional R1234yf refrigerant that is required at the rate of \$11.05 per ounce.

Unfortunately, some vehicles may have minute leaks that go undetected by a vacuum/pressure leak test. For this reason, Jiffy Lube cannot warranty against minute leaks in your system.
